

**Advisory Group Self-Evaluation
Content Managers AG
XX November 2017**

2017 Work Plan Items	Red, Amber, Green*	Comment
Provision of national perspectives on current SNOMED CT content projects and topics		Group members have provided input on SNOMED CT content projects and topics as required which has assisted with the progression of those work items.
Prioritization of the IHTSDO Content Tracker		Task completed by the sub group and the information has been used to assist with determining priority areas of work for Content Tracker Cleanup Project.
Development of collaboration on content development between Members		Member led project which saw collation and analysis of nine extensions identifying that there was some overlap in content and also some differences in file naming conventions. A page is currently being set up providing a high level view of national content (per extension) that currently exists.

**Red: item has stopped or been abandoned; Amber: item is delayed; Green: item is complete or likely to be completed on schedule.*

Should the AG continue to operate for another year? Why or why not?

- Yes this Advisory Group should continue. It is an effective group providing valuable input and feedback which supports SNOMED International content activities.
- In addition to ongoing feedback on current SNOMED CT content projects and topics, for 2018 the group has also been asked to provide a national perspective on the impact on users of the EAG content recommendations.

Additional comments:

- This group meets regularly (usually monthly) and there is active participation by group members.

- The homogeneity of group membership is assisting with Member collaboration on content, which in addition to supporting the members has provided SNOMED International with an increased awareness of where members have focused their content development activities.
- For 2018 the group has identified further opportunities for Member led collaboration.
