

Terminology Implementation in Australia

Presenter: Kate Ebrill, NEHTA

Audience

National Release Centres, parties interested in Australian implementation activities

Objectives

To provide an overview of the issues impacting uptake, the current state and recent initiatives for terminology implementation in Australia

Abstract

The National Clinical Terminology and Information Service within NEHTA have been working on a national terminology implementation plan for SNOMED CT-AU and the AMT (Australian Medicines Terminology). This presentation looks at the issues and perceptions impacting the uptake of terminology in Australia, the current state of terminology implementation together with our plans for the way forward. A focus on some specific initiatives will be included.
