

Tutorial: SNOMED CT Tooling

Tutor: Rory Davidson, IHTSDO

Duration: 90 mins (including discussion)

Audience

Terminology management tooling users, implementers and development

Objectives

Provide an update on the IHTSDO Tooling roadmap and provide technical insight into the IHTSDO Tooling's current services including the IHTSDO SNOMED CT Browser, the IHTSDO Mapping Tool, and the Members Distribution & License Service.

Outline

IHTSDO's open source tools for managing and interacting with SNOMED CT have been evolving over the last 12 months and will continue to do so through the coming 12 months. This session is aimed at those interested in understanding what the tools already do, how the tools have been implemented and how the community can use the open source code to use and enhance these tools. The session will also provide information on what is coming up next from IHTSDO Tooling.
