-

## **1 Introduction**

### **1.1 Background**

This document is to provide visibility to the Members of relevant feedback received during the Beta Release period, and any actions taken as a result of this feedback.

### **1.2 Purpose**

This document provides information related to differences between the files distributed as part of the July 2019 Beta Release of the SNOMED CT International edition, and the Members' distribution of the July 2019 SNOMED CT International edition.

Please contact SNOMED International at [support@snomed.org](mailto:support@snomed.org) with any questions related to the contents of this document.

### **1.3 Scope**

This document relates exclusively to the July 2019 International Edition, and not any prior Releases.

### **1.4 Audience**

This document is intended for use by SNOMED International Member National Release Centres only, and should not be distributed to Affiliate licensees without permission from SNOMED International.

## 2 Notes for the July 2019 Member Release

### 2.1 Summary

The feedback about the July 2019 SNOMED CT International Beta Release that was received during the Beta period, was used to update the International edition release package ready for the Member release on 30th June 2019.

There was some feedback provided that, for a variety of reasons, didn't result in changes to the July 2019 release, but instead will be resolved as part of the next editing cycle, ready for publication in future releases. Details of these "Known Issues" can be found in section 3.1 of the Release Notes that are published alongside the July 2019 International edition Member release package.

The feedback that resulted in changes being made to the Member Release package for the July 2019 International edition are detailed below in section 2.2.

SNOMED International thanks Members who contributed feedback.

The latest changes for the Member release can be seen in <http://member-release-browser.ihtsdotools.org/> - please be aware this instance of the browser has slightly reduced functionality to the Production browser, which will be available after the July 2019 International Edition public release.

### 2.2 Items Reported in the Beta feedback stage, that were resolved for the Member Release

The following item(s) were resolved in the July 2019 International Member Release package, between the publication of the Beta Release and Member Release(s):

Key	Summary	Description	Resolved
-----	---------	-------------	----------

ISRS-587 Potential duplicate relationship ID's across Stated + Inferred files

1 potential duplicate ID in the Stated and Inferred files:

2019-  
Jun-27

Stated record:

6573891021 20160731 1 900000000000207008 717676009 273249006 0 116680003  
90000000000010007 900000000000451002

Inferred record:

6573891021 20190731 1 900000000000207008 716092007 91431006 5 116676008  
90000000000011006 900000000000451002

See linked ticket for full details...

RESOLUTION: The clash in the CIS has been resolved by updating the relevant system UUID, which generated a new (non-duplicate) relationship ID in the Member release package.
