

SNOMED International: Strategy 2020-2025

SNOMED CT continues to be the most comprehensive terminology by a factor of ten times the clinical content, translated into more than 11 languages, and representing one third of the global population.

For more information on the strategy visit our [website](https://snomed.org) or email in fo@snomed.org

Over the course of a year-long consultation process, together we have set out the organization's 2020-2025 Strategy.

Arriving at this strategy has been an active and collaborative process among participants representing the organization, General Assembly, and Management Board governance bodies. Building on a strong foundation made possible through the success of the 2015-2020 strategy, the organization can begin to develop a model to link with other terminologies and classifications, providing a more informed view of the patient's record.
