

Did you know? Information about the first external monthly release of the SNOMED CT International Edition Release package

February 28, 2022

SNOMED International has published the SNOMED CT International Edition every six months, on 31st January and 31st July each year as its means of releasing the product. As the organization has been communicating over the past year, SNOMED International is transitioning to a more frequent delivery schedule of the SNOMED CT International Release Package. While this is a newly available feature, it is important to recognize that this enhancement only changes your current process if you or your National Release Center decides to consume frequent releases.

Last year, SNOMED International began to pilot a more frequent delivery schedule of the SNOMED CT International Release Package. Making the product available on a monthly basis means less down-time required between release cycles, enabling faster turnaround of authoring content and a more agile and responsive terminology. Additionally, smaller content projects can potentially reduce the time required for urgent content changes...
