

# Did you know...NHS Digital Connectathon Day, April 12th-13th

Are you attending the SNOMED International April Business Meeting? Do you want to know more about NHS Digital's concept for a UK National Clinical Terminology Service? If so, stay on at the Amba on April 12th-13th and take part in this National Clinical Terminology Service Connectathon Day.

## Objectives of the 2-day technical session include:

- Introduce the NHS Digital Proof of Concept for a UK National Clinical Terminology Service (NCTS) and its use of the HL7 Fast Healthcare Interoperability Resource (FHIR®) specification.
- Provide hands on coding and testing.
- Gather input on potential use, development of the specifications and infrastructure of a potential NCTS. This includes feedback on the planned functionality as well as understanding the priority functionality that implementers may require.
- Develop a community of interest to participate in future development and discussion of a NCTS service.

Contact [Gwen Smith](#) for additional information.

*\*Please Note: This is an event organized by NHS Digital, and is not affiliated with the SNOMED International April Business Meeting.*
